

COURSE COMPLETION REPORT

Networking Basics

Cisco Networking Academy

Name	Himanshu Raj Solanki
University	IILM University, Greater Noida
Branch	CSE Core
Semester	3rd Semester
Roll No.	25SCS1003003970
Course Completion	30 August 2026

A reflection on the knowledge and skills gained through the successful completion of the course.

1. Introduction

As a Computer Science and Engineering student, understanding how computers communicate with each other is an important part of my technical learning. I completed the **Networking Basics** course through Cisco Networking Academy. The course helped me build a basic understanding of computer networks and gave me a clearer idea of how devices connect, communicate, and share information.

2. About the Course

The Networking Basics course offered through Networking Academy introduced me to the fundamental concepts of networking. Instead of only learning definitions, the course helped me relate networking concepts to situations that I see in everyday life, such as connecting a laptop or phone to a network and accessing information over the Internet.

3. Why I Chose This Course

I chose this course because networking is closely connected with Computer Science and many other areas of technology. I wanted to understand the basics before moving on to more advanced subjects. Completing this course has given me a foundation that I can build upon during my further studies.

4. What I Learned

- I learned the basic purpose of computer networks and why networking is important.
- I became familiar with common networking devices and their roles in connecting systems.
- I developed a better understanding of how devices communicate across a network.
- I learned basic concepts related to addressing, connectivity, and wireless networking.
- I gained an introductory understanding of how networking problems can be approached and troubleshoot.

5. Skills Developed

One of the main benefits of completing the course was that it improved my confidence with networking terminology and concepts. I can now understand basic network-related discussions more easily and have a better foundation for studying topics such as IP networking, routing, switching, and network security in the future.

6. Practical Understanding

The course made me realize that networking is present in almost every part of modern computing. Whether it is using Wi-Fi, communicating between computers, accessing an online service, or connecting devices within a network, networking plays an essential role. This practical perspective made the subject more interesting and easier to relate to.

7. Learning Outcome

After completing Networking Basics, I have a stronger foundation in computer networking than I had before starting the course. I am now better prepared to explore advanced networking concepts and apply this knowledge to my academic projects and future technical learning.

8. Personal Reflection

Completing this course was a useful learning experience for me as a CSE student. At the beginning, some networking terms and concepts were unfamiliar, but as I progressed through the course, I started connecting them with things I use every day. The course encouraged me to learn beyond my regular classroom studies and helped me understand the importance of building practical technical skills alongside academic knowledge.

9. Conclusion

Overall, completing the Cisco Networking Academy Networking Basics course has been a valuable step in my technical learning journey. It has helped me understand the fundamentals of networking and has motivated me to explore the subject further. I believe the knowledge gained from this course will be useful in my upcoming semesters and in developing my career in the field of Computer Science.

10. Certificate Details

Course	Networking Basics
Offered through	Networking Academy / Cisco Networking Academy program
Learner	Himanshu Raj Solanki
Completion Date	30 August 2026
Certificate ID	3cd82f60-b8f9-46f2-a95e-98360f309ecb

The certificate provided for this report confirms successful completion of Networking Basics through the Cisco Networking Academy program on 30 August 2026. It also identifies the learner as Himanshu Raj Solanki and provides the certificate ID shown above. ■filecite■turn0file0■L2-L13■
